ORCID

ORCID is the Open Researcher and ContributorID. ORCID allows you to distinguish your research outputs from other researchers with the same name, create a profile to showcase your outputs, and link your ORCID profile through to your ResearcherID and Scopus Author ID profiles. Some journals now require your ORCID when submitting articles for peer review and publication.

Creating an ORCID
- Go to http://orcid.org/
- At step 1, select Register now
- Complete the form
- Your ORCID unique 16 digit ID is created
- Now add information to help distinguish you from other researchers, e.g. personal information, education, and funding
- In Employment, enter University of South Australia and select it from the list
- In the left hand box, add details for Also known as, Country, Keywords, and in Websites link to your UniSA home page

Adding your research outputs to ORCID from ResearcherID
- Before you import your research outputs from ResearcherID, first review your profile and ensure the publications list is current. If you need to update it, refer to Create and add your research outputs to ResearcherID Research Quick Guide
- In Works, go to Add works and select Search & link. Select ResearcherID from the list
- You will be asked to authorise access to your record, select Authorize
- Login to your ResearcherID profile
- At the ‘You do not currently have an ORCID record...’ screen, select Yes. You will receive an email indicating your ORCID record was amended.
At the Send ResearcherID publications to my ORCiD account, select Go

Tip: Do not use the Retrieve ORCiD publications into my ResearcherID account option, as this affects the amount of information transferred, including citation metrics.

Your research outputs will display. Tick Select Page, then Send

Your research outputs will be sent to ORCiD. Refresh the ORCiD screen to display the list.

**Linking ORCiD to Scopus Author identifier**

- Before you import your research outputs from Scopus, first review your profile and ensure the publications list is current. If you need to update it, refer to Review your author profile and research outputs on Scopus Research Quick Guide
- Go to Add works and select Search & link. Select Scopus to ORCiD from the list
- You will be asked to select your Scopus profile. Tick and select Next
- Select your preferred profile name. We recommend Last name, First name, then Next
- Review your authored publications list and untick any that are not yours. Once completed select Next
- Review your publications once more and select Next
- Input your email address and Send Author ID
- Then select Send my publication list
- Your publications will be sent to ORCiD. Refresh the ORCiD screen to display the list.

**Review your profile on ORCiD**

- Both ResearcherID and Scopus may index the same research outputs. ORCiD should be able to detect duplicates based on the DOI (unique identifier for the publication) where available
- To doublecheck for duplicates, Sort the list by Title. Rather than delete either version from Scopus or ResearcherID, select one version then change the everyone green icon to the red padlock, to hide the version you do not want to appear.

**Related Research Quick Guides**

- Create and add your research outputs to ResearcherID
- Manage and maximise your author profiles
- Review your author profile and research outputs on Scopus

**Help with registering, reviewing and managing your profiles**

The Library runs workshops on Manage and maximise your author profiles throughout the year. The calendar and registration links are available at w3.unisa.edu.au/researchstudents/workshops/ and are also advertised via email.

Individual appointments or tailored workshops for Schools and Research Institutes are also available.

Contact your Academic Library Services team for further information or assistance.
